

THE TIMBER BLOCK ADVANTAGE

15 YEAR WARRANTY ON STAINS

PUSHING THE BOUNDARIES

Our newest innovation? Extended protection. Most of our exterior finishes are now available with a 15 year warranty! The key to this quantum leap for engineered wood homes resides in a proprietary pre-treatment and top coating combination. Initially treated with a wood preservative treatment, our homes leave the factory prefinished with 2 coats of stain applied at the factory. A third and final coat applied on the job site will determine the feel and look you have selected, guaranteeing lasting value and peace of mind.

INNOVATION

Our panelized walls are a distinctive find in the custom wood home industry. They are-to our knowledge-the only pre-finished wall system available on the market. The pre-stained walls will be delivered right to your site. All that's needed is a final coat to give it your personalized touch!

Timber Block homes are built to withstand harsh environments, from extreme cold to extreme heat. Timber Block's system will not shrink, expand, warp or check like a typical full log home.

REWRITING THE BOOK... AGAIN!

Continued advancements in processes and formulation have enabled us to produce finishes that protect your home up to 15 years! Building on innovative tradition from our patented building system, and following thorough testing over a 10 year period, we are very proud to present this game changing protection. And it doesn't stop at this industry leading warranty! In the process of redefining our engineered wood home protection offering, our Art & Design team created a brand new array of rich colors and finishes to choose from!

A WIDE ARRAY OF COLORS & FINISHES

Paired with different base colors and finishes, we now have 8 color options to choose from. This, combined with the 3 profile options and the different surface finishes, you now more than 200 different ways to customize your Timber Block home!

BETTER WARRANTY FOR LESS MAINTENANCE

Plus, with warranty coverage ranging from 5 to 15 years, depending on the chosen finish option, you can now enjoy the genuine benefits of wood, without the traditionally related maintenance.
